Health. Safety. Technology.

Improving the class-room experience for students, faculty, and administrators with smart technology.

Air Purification
Medical-grade air purification systems that removes viral and bacterial particles down to .007 microns from the air at a filtration efficiency over 99.99%!

Thermal Screening
Adhere to state and local screening guidelines with thermal sensor technology. Non contact kiosks with access controls are efficient and privacy features.

Security Cameras
Protect students and faculty with security monitoring that detects motion and can trigger a vocal response, take a snap shot of the visitor, and send it to your security team.

Integrated Lighting
Increase efficiency by adding automated light control. Fully integrate lighting, shading, and sensors for maximum energy savings to meet the needs of your facility.

Audio/Video
Stadium, auditorium, gym, or classroom – our high-resolution monitors and quality audio solutions allow for your school's messaging to be clearly seen and heard.

Digital Signage
Indoor or out, signage for wayfinding, school promotions, and activities improves communications with an easy-to-use interface accessible over your network.
